CSS	

## Projects

### Twin Allegiance Web Application

Technologies used: PHP, CSS, MySql

Twin Allegiance is a web-based installment management system designed to streamline the process of tracking and managing installment payments efficiently. Developed using HTML, Tailwind CSS, and PHP, the application provides a user-friendly interface for businesses and individuals to monitor payment schedules, generate reports, and automate reminders. The system ensures seamless financial tracking, reducing manual effort and improving accuracy in installment-based transactions.

### **Donation application**

Developed a cross-platform donation application using Flutter, enabling users to make seamless donations to various causes and organizations. The app features a user-friendly interface, secure payment integration, real-time donation tracking, and campaign management. It provides users with a transparent and efficient way to contribute to charitable initiatives while ensuring smooth performance and accessibility across both Android and iOS platforms.

### **Chayah Villa**

The official website for Chayah Villa Group, a collection of modern Bali villas that seamlessly blend luxury and comfort. The website, built on the Wix platform, offers a user-friendly interface that allows visitors to explore villa options, view high-quality images, and make reservations effortlessly. It effectively showcases the unique features and services of each villa, providing potential guests with a comprehensive understanding of what Chayah Villa Group has to offer.

## **Interests**

App Development, Back End Development
